3. HAZARDS IDENTIFICATION

Emergency Overview: Combustible liquid and vapor.

Potential Health Effects

Eye: Causes eye irritation.

Skin: Contact with skin may cause mild irritation. Prolonged or repeated contact can result in defatting and drying of the skin which may result in skin irritation and dermatitis (rash). Personnel with pre-existing skin disorders should avoid contact with this product.

Ingestion: This material may be harmful or fatal if swallowed. Harmful or fatal if liquid is aspirated into lungs. Irritating to mouth, throat, and stomach. Can be readily absorbed by the stomach and intestinal tract. Symptoms include burning sensation of the mouth and esophagus, nausea, vomiting, diarrhea, dizziness, staggering gait, drowsiness, loss of consciousness and delirium as well as additional central nervous system effects. May cause headache.

Inhalation: Vapors can cause irritation of the respiratory tract. High concentrations can cause headache, nausea, weakness, lightheadedness, and stupor (CNS depression).

Chronic Effects: Possible brain damage from overexposure. Overexposure may cause nervous system damage. Chronic effects of ingestion and subsequent aspiration into the lungs may cause pneumatocele (lung cavity) formation and chronic lung dysfunction. Significant exposure to this chemical may adversely affect people with chronic disease of the respiratory system, central nervous system, kidney, liver, skin and/or eyes.

4. FIRST AID MEASURES

Eyes: Remove contact lenses if worn. Flush eyes with water for at least 15 minutes. Get medical attention if irritation persists.

Skin: Remove contaminated shoes and clothes and clean before reuse. Wash affected area with soap and water. Seek medical attention if irritation persists.

Ingestion: Do not induce vomiting to prevent aspiration into the lungs. Do not give liquids. Get medical attention immediately.

Inhalation: Remove to fresh air. Provide oxygen if breathing is difficult. Get immediate medical attention.

5. FIRE FIGHTING MEASURES

Flash Point / Method: 142°F TCC

Flammable Limits: Not Applicable

Extinguishing Media: Dry chemical, foam or carbon dioxide, water fog

Autoignition Temperature: Not Applicable

Protection of Fire Firefighter: Do not use water. Water spray to cool containers or protect personnel. Wear full protective equipment and self-contained, positive pressure breathing apparatus.

Fire & Explosion Hazards: WARNING: Combustible liquid and vapor. May cause flash fire or explosion. Vapors/dust may form explosive mixture with air. Vapors may travel to a source of ignition and flash back. Empty containers retain product residue (liquid and/or vapor) and can be dangerous. DO NOT pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat, flame, sparks, static electricity, or other sources of ignition. Also, DO NOT re-use containers without commercial cleaning or reconditioning.

6. ACCIDENTAL RELEASE MEASURES

Spills: Contain spilled material. Absorb with inert material (e.g., clay, dry sand or earth) and transfer to secure containers. Flush area with water to minimize residue.

7. HANDLING AND STORAGE

Follow all MSDS/label precautions even after containers are emptied because they may retain product residues. Ground and bond containers when transferring material. Use spark-proof tools and explosion proof equipment. Use only in well ventilated area.

Store in a cool and dry area. Materials can accumulate static charges, which can cause an incendiary electric discharge.

Protect from direct sunlight. Keep away from heat, sparks, flame. Keep containers closed when not in use.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls: Good general ventilation should be sufficient to control airborne levels. **Respiratory Protection:** If exposure levels exceed the PEL/TLV, use NIOSH/MSHA-approved respirator with an organic vapor filter.

Skin Protection: Wear impervious protective gloves.
