T-Shirt and Roll to Roll

Duralife Cut-Edge Squeegees

Duralife’s precision cut-edge offers the optimal sharp edge yielding the finest in print definition. Unlike rotary cut edges that leave a serrated pattern on the edge; our one-stroke cut leaves a perfect print edge.

CE SERIES

- Premium cut edge
- Close tolerance on hardness range
- Good all around performance
- Available in all sizes

TRIPLE DUROMETER PROFILES

- Excellent ink shear and better control of ink deposit
- Two softer print edges with harder center that resists flexing
- Reduces need for excessive squeegee pressure
- Maintains consistent print angle
- 3/8” Standard profile.

ALUMINIUM SQUEEGEE HOLDERS

- Durable corrosion-resistant aluminium construction
- Aluminium does not absorb any inks and wipes clean
- Ergonomic curved handle for ease of use
- Easily accepts all squeegee profiles

Duralife Molded Edge Squeegees

The individual cavity molds of Duralife ME Squeegee assure consistent and uniform blade thickness, dimensions and hardness. Duralife’s molded blade maintains its print edge and resists nicking, especially our V-shape (double beveled). Unlike some cut “Vs” that can be irregular, our 60-degree angle is always precise and consistent.

ME SERIES

- Premium molded edge
- UV and abrasion resistant
- Extended press life
- Resists nicking
- Sealed walls resist solvent attack
- Custom sizes available

SINGLE/DUAL

Individual cavity molds assure consistent and uniform blade thickness, dimensions and hardness. Duralife’s molded blade maintains its print edge and resists nicking. Duralife DUAL DURO reduces flexing and maintains a more consistent squeegee angle. Print with less pressure for longer stencil life.

■ Screen Making Accessories

High Quality Accessories for Your Screen Making Cycle

BRUSHES FOR ADHESIVES

High quality natural bristle brushes designed for the application of viscous two-part polyurethane adhesives to adhere mesh to all frame types during stretching.

LARGE SCREEN BRUSHES

- 100% chemically resistant
- Blue handle brush has medium stiffness bristles
- Green handle brush has very soft spliced bristles
- Perfect for spreading degreasers, decoaters and haze removers on larger screens

SPREADER SQUEEGEES

Durable polyurethane miniature squeegees for spreading both Ultrafix CA adhesives onto the frame and liquid blockouts onto the perimeter of stencils before printing. Available in 6 cm and 15 cm lengths.

SINGLE EDGE COATER TROUGHS

- Available in lengths of 2.5 meters
- Coating profile of 1.25mm
- Holds a high volume of emulsion for longer coating sessions

SCREEN PREPARATION BRUSHES

- 100% chemically resistant
- Stiff nylon bristles
- Perfect for spreading degreasers, decoaters and haze removers

BRUSH PADS

100% chemically resistant synthetic screen cleaning pads with an ergonomic handle that makes them convenient for applying degreasers, decoaters and haze removers to large screens.

DUAL EDGE COATING TROUGHS TROUGHS

- Available in lengths of 3 meters
- Coating edge profiles of 0.5 & 1.0 mm combined into one tool
- Made of high quality aluminium
